ZIGZA

»NEW

New innovation, Zigzag string.

Zigzag shaped polyester string provides great elasticity and ball bite.

ZIGZA 125

ELASTICITY

GAUGE 1.25mm
LENGTH 13.0m

SILVER GOLD

After the racket has been strung, the zigzag shape is smoother. The string energy returns to its original shape and provides outstanding elasticity and spin.

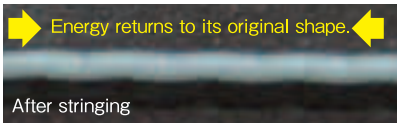

No energy

Before stringing

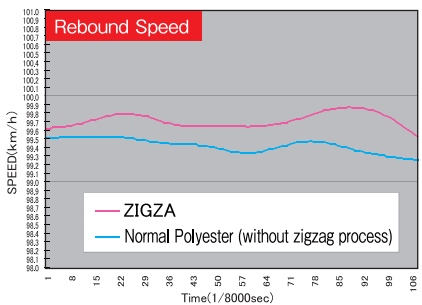

Energy returns to its original shape.

After stringing

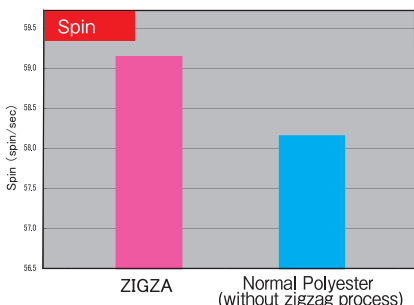

There are differences of rebound speed and spin after zigzag process.

Rebound Speed

Time (1/8000sec)	ZIGZA (km/h)	Normal Polyester (km/h)
8	98.8	98.4
15	99.2	98.4
22	99.0	98.4
29	99.0	98.4
36	99.0	98.4
43	99.0	98.4
50	99.0	98.4
57	99.0	98.4
64	99.0	98.4
71	99.0	98.4
78	99.0	98.4
85	99.0	98.4
92	99.0	98.4
99	99.0	98.4
106	99.0	98.4

Spin

String Type	Spin (rpm/sec)
ZIGZA	~98.5
Normal Polyester (without zigzag process)	~98.1

This graph indicates Rebound Speed after impact. Zigza is faster due to the zigzag process.

This graph indicates Spin comparison between Zigza and Normal Polyester without zigzag process which is tested by high-speed camera.

RENCON
REACTION AND CONTROL

Devil Spin

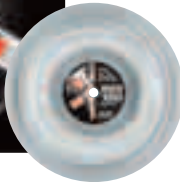

Cross section picture of RENCON DEVIL SPIN

Three raised monofilament cores provide three rough surfaces for outstanding spin on impact.

ASTERISM
[æst(ə)rizm]

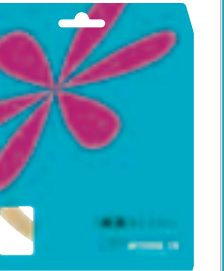

ASTERISM technology
Three Asterisk shape cores have been covered with a very thin multifilament layer which provides outstanding softer playability.

	<p>ASTERISM 125 SOFT</p> <p>Softer playability</p> <p>GAUGE 1.25mm LENGTH 13.0m</p>  <p>NATURAL</p>		<p>ASTERISM 130 MILD</p> <p>Mild feeling on impact</p> <p>GAUGE 1.30mm LENGTH 13.0m</p>  <p>NATURAL</p>
--	---	--	---

Has been developed with the experience of more than 50 years of R & D. Different elastic composite core (which is made of two different high elastic nylon) is made as the Asterisk shape reacting two opposite functions such as absorbing the shock when hitting the ball and accelerating the ball providing maximum playability.

ULTIMATE 115 HYBRID CONTROL

HYBRID

Gauge
(MAIN/CROSS) 1.10mm/1.15mm

Length
(MAIN/CROSS) 7.0m/6.5m

ULTIMATE 115 HYBRID CONTROL is a hybrid string with ultra-thin gauge (1.10mm) High Tenacity Aramid Fibres "Technora GTN" main string and ultra thin gauge (1.15mm) High Tenacity Nylon cross string. This string is designed for players seeking the playability of thin strings with the durability of thick strings.

ULTIMATE 135 HYBRID KV

HYBRID

Gauge
(MAIN/CROSS) 1.35mm/1.30mm

Length
(MAIN/CROSS) 7.0m/6.5m

The concept we designed **TOALSON** ULTIMATE 135 HYBRID KV was "Durability". **TOALSON** ULTIMATE 135 HYBRID KV is a hybrid string constructed with KEVLAR® for the main string and a synthetic string for the cross. You will soon realize this quite new harmony of durability from KEVLAR® and playability from synthetic string. **TOALSON** ULTIMATE 135 HYBRID KV is TOA new challenge for ultimate durability and playability which you will soon discover.

ULTIMATE 130 POLYESTER

Gauge
1.30mm

Length
13.5m

TOALSON ULTIMATE 130 POLYESTER is constructed with 100% polyester fibre which provides outstanding durability and exceptional all around performance.

ULTIMATE 110 POWER

Gauge
1.10mm

Length
13.5m

TOALSON ULTIMATE 110 POWER is constructed with a blend of High Tenacity Nylon monofilaments and new High Tenacity Aramid Fibres "TECHNORA® GTN" by Teijin Ltd. Ultra Thin 18L gauge **TOALSON** ULTIMATE 110 POWER is designed for the hard hitting players who want top playability-power, spin and feel-with better durability.

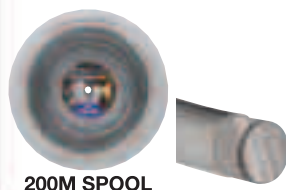

CYBER BLADE TOUR Series

CYBER BLADE TOUR THERMAXE 123

Gauge
1.23mm

Length
13.5m

TOALSON CYBER BLADE TOUR THERMAXE 123 has been developed for tournament players from the opinions and experience of **TOALSON** contract players worldwide. **TOALSON** CYBER BLADE TOUR THERMAXE 123 offers the excellent combination of elasticity plus durability by blending the special polyester material with thermoplastic material. We recommend that you reduce your normal tension by 5-10% when using this new string.

CYBER BLADE TOUR THERMAXE 127

Gauge
1.27mm

Length
13.5m

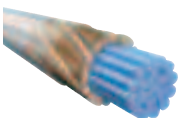

TOALSON CYBER BLADE TOUR THERMAXE 127 has been developed for tournament players from the opinions and experience of **TOALSON** contract players worldwide. **TOALSON** CYBER BLADE TOUR THERMAXE 127 offers the excellent combination of control plus durability by blending the special polyester material with thermoplastic material. We recommend that you reduce your normal tension by 5-10% when using this new string.

BIO LOGIC Series

BIOLOGIC 128

Gauge
1.28mm
Length
13.5m

TOALSON. BIOLOGIC 128 is multi strand string, which has been recently developed from the original Bio adding a new super-tough strand, combining multifilament and monofilament technologies. The string provides greater elasticity and ball feel for many hours of play.

BIOLOGIC 130CC

Gauge
1.30mm
Length
13.5m

TOALSON. BIOLOGIC 130 CC is constructed with a new super tough stand co-polymer which has high elasticity. This string has been recently designed for all types of players seeking stable elasticity and crisp playability with a soft feel. This gives a great enhancement of control and ball bite.

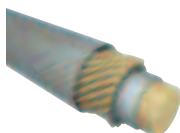

TOALSON. BIOLOGIC 130 CC is new version of BIOLOGIC series.

SYNTHETIC Series

SYNTHETIC GUT ULTRA SOFT

Gauge
1.30mm
Length
13.5m

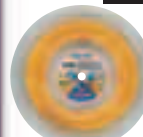

TOALSON. SYNTHETIC GUT ULTRA SOFT is designed for players seeking excellent durability and outstanding playability. This newly developed string is constructed with durable nylon monofilament & special processed soft nylon multifilament and its combination provides "Ultra" soft feel with greater resiliency.

TOA GOLD

Gauge
1.30mm
Length
12.0m

200M SPOOL

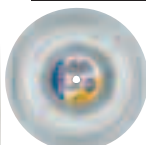

TOALSON. TOA GOLD is designed for a good combination between durability and elasticity. It is the most popular string in **TOALSON.** series in the world. It performs well in any kind of rackets.

SYNTHETIC TOURNAMENT

Gauge
1.28mm · 1.33mm · 1.38mm
Length
12m

200M SPOOL

TOALSON. SYNTHETIC TOURNAMENT is a new version of the original Synthetic 63. This string is designed for all-round players seeking the standard quality with great cost performance.

STRINGING MACHINES

Constructed of excellent materials. High performance for you.

X-1000L

FEATURES:

- 1) 6-Point Self-Centering Suspension Mounting System
- 2) Slim profile steel string clamps with a unique self locking adjustment knob
- 3) Linear pull, diamond coated, string gripper with patented roller guide
- 4) Electronically controlled, constant pull tensioning system provides precise tension control from 10 lb to 90 lb (4.5 to 40.8 kg) in 0.1 increments
- 5) The tensioner is a modular component that can be easily removed for servicing or maintenance
- 6) Foot pedal switch for "Hands Free" operation
- 7) Strong, light-weight single extrusion includes base with 1 integrated drawer and a padded tool tray
- 8) Simple compact computer unit

X-9000L

FEATURES:

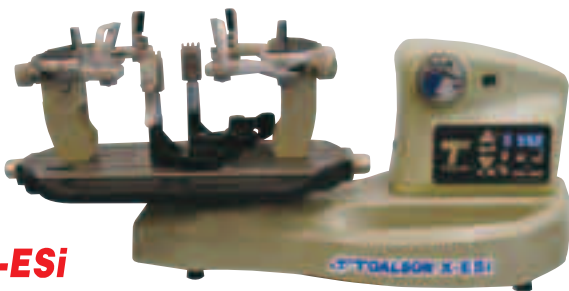

- 1) 6-Point Self-Centering Suspension Mounting System
- 2) Slim profile steel string clamps with a unique self locking adjustment knob
- 3) Linear pull, diamond coated, string gripper with patented roller guide
- 4) Electronically controlled, constant pull tensioning system provides precise tension control from 10 lb to 90 lb (4.5 to 40.8 kg) in 0.1 increments
- 5) The tensioner is a modular component that can be easily removed for servicing or maintenance
- 6) Foot pedal switch for "Hands Free" operation
- 7) Strong, light-weight aluminum extrusion construction includes base with 2 integrated drawers and a large padded tool tray
- 8) Exclusive digital string length meter

6800-i

FEATURES:

- 1) 6-Point Self-Centering Suspension Mounting System
- 2) Slim profile steel string clamps with a unique self locking adjustment knob
- 3) Linear pull, diamond coated, string gripper with patented roller guide
- 4) Electronically controlled, constant pull tensioning system provides precise tension control from 10 lb to 90 lb (4.5 to 40.8 kg) in 0.1 increments
- 5) The tensioner is a modular component that can be easily removed for servicing or maintenance
- 6) Foot pedal switch for "Hands Free" operation
- 7) Strong, light-weight aluminum extrusion construction includes base with 2 integrated drawers and a large padded tool tray
- 8) Exclusive digital string length meter

X-ESi

FEATURES:

- 1) Electric constant pull tensioner (9 to 90 lb / 4 to 43 kg)
- 2) Digital control panel for +/- tension adjustment, 9 memory settings, lbs/kgs, pulling speed, pre-stretch, knot function, and internal diagnostic check
- 3) 6-Point Quick Mount Support System
- 4) Slim profile steel string clamps with a unique self locking adjustment knob
- 5) Diamond coated, rotational string gripper
- 6) 360 degree turntable rotation with locking brake

X-STi

FEATURES:

- 1) Manual spring tension winder (9 to 90 lb / 4 to 43 kg)
- 2) Patented diamond coated, string gripper
- 3) 6-Point Quick Mount support system
- 4) Metal diamond coated string clamps with unique self-locking adjustment knob

TENNIS RACKETS

Constructed of excellent materials.
High performance for you.

FORTY LOVE Delfino

Material: 100% High Modulus Double Braided Carbon + Titanium
Head Size: 101 sq.inch
Length: 27 inch
Recommended Tension: 50±5 Lbs
Weight: 320g±5g
Balance: 300mm±5mm
Flex: Soft

High Braided Carbon

High braided carbon has been applied which provides the stable playability and ball control to be able to absorb any vibration.

Triple Vibration Damping Grommet System (T.V.D.G.S.)

It provides ideal stable playability to be able to absorb any hard hit and avoids the vibration at the ball impact by using the absorbing material on top side and both side of racket frame.

Comfort + Return = COMFORET

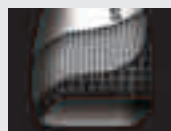

COMFORET

Material: 100% High Modulus Carbon
